

## ABOUT THE STATE

## Happenings of Interest from Different Sections

The water in Lake Champlain is at its highest known mark for the time of year, being two feet above normal.

Albert W. Butler, a Jamaica attorney, seeks the nomination as state's attorney from Windham county.

The Clyde Valley Co-operative company, Inc., has filed with the secretary of state a certificate of increase of capital stock from \$10,000 to \$20,000, the stock to be in 2,000 shares of \$10 par value each.

Joseph Augustine McNamara, municipal judge of Burlington, and Miss Mary Patricia Magner, well known through her musical talent, being the future in the Magner trial, were married in Burlington Wednesday.

As George Harston of East Hardwick was attempting to dump a wheelbarrow of refuse over a bank a few days ago, the wheelbarrow caught in his clothing in such a way as to throw him also down the bank. His collar bone was broken and the bones in two fingers.

A certificate of increase in capital stock by \$45,000 to a total of \$50,000 has been filed with the secretary of state by the Paquin Manufacturing corporation of Springfield. The stock is divided into five hundred shares of common at \$100 par value each. This corporation also filed an affidavit of the proposed issue of 450 shares of stock at \$100 for cash.

A bolt of lightning struck the house of Elmer Parlow in Forestdale Tuesday night and badly damaged the interior. The ceiling in the room where the lightning came in was badly damaged and several pieces of furniture were broken. Mr. and Mrs. Parlow were not at home. The flash set fire to a small building in the rear of the house used as a work shop and a small hen house, which was destroyed. Two men nearby were badly shocked by the bolt.

The death of Cono Laine at Vernon, following an accident, has been reported to the commissioners of industries. Laine was employed by Peter Oummet of Springfield, Mass., on a roofing job in Hinsdale, N. H. On June 6 he went through an opening in the roof from which he had been warned to keep away just previous to the accident. He suffered a fractured skull, dislocated neck and broken back, arms and legs. He was attended by Dr. Lynch of Brattleboro, Commissioner of Industries J. E. Butties states that there is some question as to whether the case would come under Vermont laws because of the doubt as to the application of the section of the law concerning the number of men employed.

## 90-Year-Old Creamery Manager.

V. R. Jones of the state department of agriculture has received a letter from A. W. Whitney, manager of the Orange county creamery in Chelsea, who is 90 years of age, and who Mr. Jones states, is the oldest creamery manager in the state still active. It is interesting to note that the Orange county creamery has had during the past year the best year in its history.

Mr. Jones has just returned from visiting various creameries in the state, grading cream and doing bacteriological work. He last visited the creamery at Morrisville and Stowe, and reports that all the creameries are doing well. Mr. Jones is making out his biennial report at the present time. He recently attended a conference of heads of 10 creameries at Burlington where the hiring of an accountant was discussed. This meeting was postponed to August 1 because of the small attendance. Eight of the creameries have signed an agreement to hire an accountant and it was desired to have 20 or more creameries in on the proposition.

## SPRAY OFTEN IN WET SEASON.

Moist Weather Favors Disease, Say Plant Industry Men.

Such is the advice of the experts in plant industry at the state college of agriculture, Prof. B. F. Luntan and Prof. M. B. Cummings. The warm moist weather of the past weeks has been very favorable to the development of many diseases of cultivated plants. In particular it may be said that the blight of potatoes, and the scab of apples—the two great enemies of a farmer's nature, are likely to start rapidly during such weather as has prevailed since the

middle of June. Conditions of moisture, shade and warmth, combined with rapid growth, are those most conducive to the organisms that cause disease.

Potatoes should be sprayed with Bordeaux mixture in a wet season as often as every ten days, and apple and pear trees at least twice a month. For apple trees either the Bordeaux or the lime sulfur should be used. The spraying should be done only when the foliage is dry. If one sprays between the periods of showers or long storms, sufficient time should be allowed after the application and before the next rain to permit the spray to dry on and thus become adhesive for some weeks. Bright, sunny and windless days are the preferred ones for spraying. It is well to be prepared for prompt work; then wait and watch for a good day to spray. Be thorough.

## MOTOR VEHICLE ACCIDENTS.

Leon C. Williamson of Springfield Struck Telephone Pole.

Leon C. Williamson of Springfield has reported to the secretary of state that his car ran into a telephone pole and settled on one side when he was driving on the North Springfield road on the evening of June 27. He was out about the face, the wishbone, windshield, top, and one leaf of a front spring of the car were broken and the fenders were bent.

George Thayer of Waterbury has reported running into a dog in Middlebury June 24. L. J. Pudvah of Lowell reports that \$300 damage was done to his car when a bridge over a brook in Lowell village collapsed as he crossed it the night of June 22. Mr. Pudvah suffered bruises. The abutments of the bridge were weakened by high water in the brook owing to rains. Mr. Pudvah and the passengers in the car were quickly rescued, but owing to the high water and darkness and wind, it was necessary to leave the car in the brook all night.

Hollis S. Johnson of Boston reports a collision between his car and another driven by Carl Johnson of Rutland on June 21, owing to the Rutland car's skidding on the wet rails. The damage to the Boston car was about \$100. The Rutland car was also damaged.

R. J. Ryder of Barton has reported to the secretary of state that he turned his car out for a herd of cows about a quarter of a mile from Barton and that the car went over an embankment and landed on its side. No one was injured and damage to the car was slight.

Pierre Lefebvre of Bridgewater reports that one front wheel of his car was broken when he backed over the bank while attempting to turn his car around between Bridgewater and Plymouth last Sunday.

## Burlington Odd Fellows to Build.

As a step toward the erection of an Odd Fellows home in Burlington Green Mountain lodge number one and Hamilton lodge number 14, working with the various other branches of the order, have arranged the purchase of the so-called Fox lot, situated east of the New England Telephone building on College street. The lot has a frontage of 106 feet and a depth of 100 feet. It is bounded on the east by a property owned by Dr. W. B. Lund.

It is directly opposite the College Street church and is in the same block as that in which the Elks intend to build. It is near the business section but in a retired section. The property was purchased through Clark C. Briggs by R. C. Smith who will transfer it to the Odd Fellows within a few days.

Terms at time of sale. Sale positive as I have no use for this property.

GEORGE E. MILLS, Owner.

D. A. Perry, auctioneer, Barre, Vt.

## On the Road of Good Intentions

## BIG MAPLE SUGAR STORAGE.

Product at Essex Junction Waiting for the Fall Trade.

The new warehouse of the Vermont Maple Products Co-operative Exchange, Inc., at Essex Junction, stored about 15,000 gallons of sugar during the past season. It is stated by Amos C. Eaton of South Royalton, manager of the warehouse, who conferred on Thursday with E. S. Brigham, state commissioner of agriculture. This is one hundredth of the estimated total yield of one and a half million gallons. Of the total crop about 30 per cent was marketed directly or through commission men. Mr. Eaton estimates that the warehouse this season received the products of sugar orchards in Rochester, Chelsea, Danville, Cabot, Glover, East Berkshire, Huntington and Underhill, representing Washington, Chittenden, Orange, Windsor, Franklin and Orleans counties. Co-operative corporations of producers have been formed in most of these localities. It is hoped within a few seasons to market all the sugar yield of the state through the exchange at Essex Junction.

The yield stored at Essex Junction has not been sold as yet, but is stored for the fall trade, opening about Sept. 1. The exchange has customers in Missouri, Louisiana, Florida and California, and has had orders to send its products to Switzerland, Scotland, England and Porto Rico. Extensive advertising has been carried on through hotel men and the Rotary clubs all over the country. The aim

of the exchange is to make Vermont maple products known all over the country. Especial attention has been given to New York City and Los Angeles, Cal.

The exchange's prices are based on a rate of \$2.75 for syrup in gallon cans. For wholesale orders from jobbers the price basis is \$2.25 a gallon. It is hoped to pay the producer \$1.75 a gallon for his product. The exchange has already advanced 90 cents a gallon to the producers.

Probably the next large co-operative sugar project has been carried on in St. Albans during the past season by the Weldon National Bank of St. Albans with the Franklin county producers. It is estimated that 50,000 gallons have been produced under an arrangement of loans and joint marketing. It is understood that this arrangement will not hold good for another season. Another group at Wilmington has collected approximately 6,000 gallons during the past season. This is marketed through the Eastern States exchange at Springfield, Mass.

Don't forget—see your newsdealer or newsboy and order next Sunday's Boston Globe in advance.
